- Obedient plant
- Prairie dropseed
- Purple coneflower
- Rattlesnake master
- Staghorn sumac
- Wrinkle-leaf goldenrod
- Gray's sedge

Take a leisurely tour through Lehigh Gap Nature Center's native habitat gardens...

Native Sensory Garden Trail

This brochure is your guide to a fun and interactive learning experience that will introduce you to a variety of unique flora that call Pennsylvania home. As you follow the ADA-accessible paths outlined on the enclosed map, you will discover over two dozen sensory-friendly native plant species that you are encouraged to **see, smell, hear, or touch!** The sensory garden signs placed throughout the garden will help you find the plants and tell you more about them. Also look out for other sensory features in the garden, including musical instruments and please-touch tiles!

Over two dozen sensory-friendly native plants and signs!

Outdoor musical instruments!

Please-touch tiles!

About the Habitat Gardens:

Lehigh Gap Nature Center's habitat gardens feature over 200 native plant species. Each year, these gardens reveal a procession of flowering plants providing nectar and pollen for native bees, butterflies, and hummingbirds, as well as vegetation for insects that form the basis of the food web. These gardens are also a demonstration of how anyone can incorporate native plants into their own home or community landscape. Many Lehigh Gap Nature Center volunteers have been involved in the design, landscaping, planting, and maintenance of these beautiful gardens. **New garden volunteers are always welcome!**

About Lehigh Gap Nature Center:

Lehigh Gap Nature Center is a member-supported, nonprofit environmental education center and wildlife refuge. Through our efforts to revegetate a once barren and lifeless section of the Kittatinny Ridge, LGNC established the first environmental education center in the U.S. on a Superfund site. Today, the restored site is home to a 756-acre wildlife refuge featuring hundreds of native species, 13 miles of trails, and endless opportunities for learning, ecological research, and outdoor recreation.

Contact Us:

Lehigh Gap Nature Center
